

WARNING SIGNS OF A HEART ATTACK

If you think you may be having a heart attack, call 911 immediately!!!

Every second counts. Delays increase the likelihood and amount of heart damage due to low oxygen. Time is muscle. So get medical help as quickly as possible. Heart attacks present a variety of warning signs...not simply chest pain. Warning signs include:

- Pressure, squeezing or pain in the center of the chest felt for several minutes or more or that comes and goes
- Pain that extends to arms, neck, jaws, ears or shoulders
- Chest discomfort with lightheadedness, fainting sweating, nausea or shortness of breath
- Unusual type of chest or stomach pain
- Unexplained nausea or dizziness
- Shortness of breath and difficulty breathing
- Unexplained weakness or fatigue
- Heart palpitations, cold sweat or paleness

Location

Located within Lane Regional Medical Center, the Lane Cardiovascular Center has its own entrance with convenient parking.

To make an appointment, please call 225-654-1559.

Care You Can Count On

6300 Main Street
Zachary, LA 70791

LANE CARDIOVASCULAR CENTER

Our Physicians

Robert Drennan, MD

Electrophysiologist

- Board Certifications: Internal Medicine, Cardiology and Nuclear Cardiology

Thomas "Ryan" Gullatt, MD

Electrophysiologist

- Board Certifications: Internal Medicine and Cardiovascular Disease

Babu Jasti, MD

Interventional Cardiologist

- Board Certifications: Internal Medicine, Cardiovascular Disease and Interventional Cardiology

Abdullah Munir, MD

Interventional Cardiologist

- Board Certifications: Internal Medicine, Cardiovascular Disease, Nuclear Cardiology, Echocardiography

Phillip Smith, MD

Interventional/Structural Cardiologist

- Board Certifications: Internal Medicine, Cardiovascular Disease, Interventional Cardiology, and Echocardiography

Charles Thompson, MD

Interventional Cardiologist

- Board Certifications: Cardiovascular Disease and Cardiovascular Computed Tomography

Medical Center

Care You Can Count On

CARE.

One simple word says so much. When the subject is heart care, this humble word has many meanings.

It begins with **human touch** – the friendly, compassionate, personal attention that makes every patient feel like the only patient.

It continues with **commitment** – from a team of world-class physicians, skilled nurses and experienced staff members.

It's **never ending** - because our team shares a common purpose: providing the highest quality heart care possible.

To make an appointment, please call 225-654-1559.

What Does Lane Cardiovascular Center Provide?

Emergency Services

- 24/7 Call Coverage for Emergencies

Pre-Risk Assessments & Diagnostic Services

- EKG
- Stress Test
- Vascular Ultrasound
- MRI
- 80 Slice CT (Computed Tomography)
- Echocardiography
- Holter Monitors
- Nuclear Medicine Studies
- Arterial-Venous Dopplers – Lower/Upper Extremities
- Coronary Artery Calcium Scoring
- Abdominal Aortic Aneurysm (AAA) Screening
- Ankle Brachial Index (ABI) Screening
- Tilt Table Testing

Peripheral Vascular Services

- Interventional Cardiologists
- Vascular Surgery
- Interventional Radiology

Cath Lab Procedures

- Diagnostic Cardiac and Peripheral Catheterizations
- Angioplasty (PTCA)
- Atherectomy
- Rotoblator for Peripheral Arterial Disease (PAD)
- Stent Placement
- Opening Blocked Coronary Arteries
- Removal of Artery Plaque
- (IVUS) Intravascular Ultrasound
- Insertion of Pacemakers
- Insertion of Automatic Implantable Cardioverter Defibrillator (AICD)
- Carotid Angiograms
- Cardioversion
- IVC Filter Placement
- Loop Recorder Placement
- Transesophageal Echo (TEE)
- Shockwave
- Venous Thrombectomy

Modern Technology

If you are having a heart catheterization, ask your cardiologist if you are a candidate for these techniques:

- Transradial access through the wrist instead of the groin. Benefits include:
 - Much less pain and discomfort
 - Virtually no bleeding complications
 - Significantly faster recovery time
 - Quicker mobility (no need to lie flat for 4-6 hrs)
 - Earlier discharge, most go home same day
- CardioMEMS pulmonary artery pressure monitoring system
- Orbital devices, such as the Diamondback 360, to remove arterial blockages caused by Peripheral Arterial Disease (PAD)
- CROSSER ultrasound-assisted catheter to enable angioplasty in extreme cases of Peripheral Vascular Disease (PVD) in the legs
- Avigo Ultrasound Optimization system to identify precise measurements of narrowed arteries responsible for blocking blood flow to the heart
- Supera Stent to treat long lesions with low radiation exposure
- Pressure wire to measure blood flow within the arteries
- Impella, the world's smallest heart pump, to relieve the heart's pumping function during cardiac interventions
- The S-ICD System, the world's first subcutaneous implantable defibrillator, to treat patients at risk for sudden heart attacks
